Monthly Desert Locust Bulletin

issue37

June 2009

INTRODUCTION

In the Month of June a survey had been carried out and the two officers Empres Link person Mr. Abdilahi 20-24/06/09 and EA care taker Mr. Jama on 19-23/06/09 how to know to locust situation.

Locust Situation

All the locust breded in the coastal areas when they reached the fledging stung and became immature they climbed up the height plateau escarpments areas and the mountains in the regions of Awdal (Borama)Maroodi-jeeh(Hargeisa)Sahil (Berbera) Togdheer(Burao) and Sanag (Erigavo) .

But early in the month of June it moved and divided into two Main parts. Bart of them were, crossed the border between Somaliland and Ethiopia which interred the north east of Ethiopia and the other main part moved to the east region Sahil, Togdheer and Sanaag .

Again same parts were moved south of Togdheer and crossed the border between Ethiopia south eastern of Ethiopia and breded all the breeding areas in the south of Togdheer. The other main part were moved the eastern Golis range mountains such as :-

Ga,an-Libah mountains , Sheikh mountains (Wager) negagir mountains, Las-idleh above mountains, Bow-bowleh and Buro-Kaweyneh mountains Ehedad mountains , Aglub mountains Siraadley, Dinowlahe , Hareed, Mountains , Dayaha(Afaaf) river Surad mountains , Daalo mountains Hamas and Midhisho mountains and the Golis range above las-korey and Elayo such as Galdora

That locust were not crossed the border between Somaliland and Punt land, because there were a big famine in Punt/land as we hard, and also Nugal south of Sanag ,as we heard some of the locust were crossed the red Sea to south Yemen

HORDHAC

Bishii June 2009 waxaa sahan bile ah wada sameeyey Empres link person and DICO-EA care taker Mr. Cabdilahi 20-24/06/09 iyo Mr. Jama 19-23/06/09 si loo ogaado xaalada ayaxa.

Xaalada Ayaxa

Ayaxii ka dilaacey xeebta Ayaxu ku dhalo markii uu aad u wada dilaacey ee uu gadhey heer duulitaan wuxuu soo wada korey dhulka taagaga ah ee sarsare ee togoga buuraha ku yaala iyo jeexjeexyadoda sida gobolka

Awdal (Borama)Maroodi-jeeh(Hargeisa)Sahil (Berbera) Togdheer(Burao) and Sanag (Erigavo) ka dib wuxuu u qeybsamey dhowr qeybood oo waaweyn. Qeyb waxaey ka gudubtey xuduuda u dhaxeysa Somaliland iyo Ethiopia ee dhinaca Awdal (Boorama) qeyb kaloo weynina waxey u gudubtey bariga sida Maroodi-jeex , Sahil,Togdher,iyo Sanaag .

Kaasoo u sii kala qeybsamey qeyb ka gudubtey koonfurta Togdher una gudubtey koonfur Bari Ethiopia. Qeybtii kale ee ugu weyne waxey u sii gudubtey buuraha waaweyn ee gobolka Sanaag iyo Saahil u dhaxeeya sida Buuraha Wagar, Nageyger,buuraha Laas-iidleh iyo Xagal ka sareeya , Bow-bowleh, Buuro-ka weyne , Ehdad,Aglub,Siraadley,Dinowleh,Har eed,Dayaha,Surud,Daalo,Hamaas,Mi dhisho,

Iyo Buuraha ka sareeya Laas-qorey iyo Celayo sida Buurta weyn ee Galdora.

Ayaxaasi umuu gudbin dhinaca Puntland maxaa yeelay waxaa ka jirtey abaar aad u balaadhan sida aanu maqalney laakin waxaa la sheegay in Ayaxa qaarki ka gudbey Bada cas eek u began Waqooyiga Gobolka Sanaag una gudbey

Therefore the above two officers I have been mentioned above were carried out a survey from Hargeisa to Lebi-Sagale, Bali-dhiig and Adanleh down to Oog and Nugal that a survey was carried out by the Empres Link Person and used with Elocust2 and sent the messages by the satellite E-mail

During that survey no locust was observed but the local people were reported that is were passed them and breaded their areas.

The other survey were carried out DLCO-EA care taker Mr. Jama From Borama height plateau escarpments to the coastal areas to the eastern

Of Berbera up to Hagal District during that survey he was met a bit problem to the ELocust2 he was carried and he was used GPS as he was reported before. And during that survey he was met the following locusts

A solitaries adult of immature was seen on Hiranle (102254N/442216E) solitaries adult immature , adult was observed on Beyo(102213N/452556E) scattered adult immature had been seen on Tunka(101719N/453540E) in Hagal (101505N/454418E) high density of immature swarms sized of 100ha was observed.

Vegetation

The in general the vegetation in the coastal found dry , while those in the plateaus of the Golis range are green

Also the plateaus areas in the border between Somaliland and Ethiopia the vegetation were dry only seven palaces got light moderate rains see the form attached the previous report I was sent to you.

Soil

The soils in the Golis range are wet but all the other places are dry.

Yementa Koonfured. Hadaba Badhatamihii bishii June waxaa sahan wada sameyey Empres link Person iyo DLCO-EA care taker.

Empres link person wuxuu sahan kiisa ka bilaabay Koonfurta Hargeisa ilaa xuduuda Somaliland iyo Ethiopia u dhaxeysa Hargeisa ilaa Lebi-sagale,Beli-dhiig,

Odanleh,Qorilugud,Horufadhi,Aynaba, Oog ilaa Koonfurta Erigavo Xudun agteeda.

Mudadi sahankaa lagu jirey wax Ayax ah lamaan kulmin dhulkaa la sahaniyey badidiisunua waxey aheyd Qaley l ilaa 7meelod oo roobaba fudfud oo meel dhexaad ah ka daen mooyane sidoo kale ciiduna waxey aheyd qaley l.

DLCo-Care taker isaguna wuxuu ka bilaabay sahan kiisa Boorma ilaa Hagal oo dhinaca xeebta ah Bariga Berbera wuxuuna kula kulmay Ayax meelaha soo socda :-

Hiranle (102254N/442216E) solitaries adult immature, adult was observed on

Beyo(102213N/452556E) scattered adult immature had been seen on Tunka(101719N/453540E) in Hagal (101505N/454418E) high density of immature swarms sized of 100ha was observed.

Dhirta Iyo Daaqa

Dhirta iyo daaqu dhinaca xeebta waxaa lagu soo arkey in ay aheyd qaley l dhinaca sare ee buuraha laga soo bilaabo Borama ilaa Erigavo waxey aheyd Cagaar.

Ciida

ciiduna Xeebta waxey aheyd Qaley l laakin dhulka buuraha ah ee aan kor ku soo shegney Boorama ilaa Sanaag waxaey aheyd qoyaan.
