Monthly Desert Locust Bulletin

issue40

September 2009

INTRRODUCTION

In the month of September there was no survey carried out but information collection concerned locust was made which was received from the travelers and the government representatives residing there so the situation had been the following.

Locust situation

In that month the locust situation was calm because the long coastal which is locust breeding areas was hot during that month but I isolated solatarious locust was reported to see in the following places Osoli river ,Bararis,El-helay ,Faruur river in Bullo-har. The vegetation in the regions Maroodi-jeeh and Awdal was green ,because they were received heavy and moderate rains which fallen in the plateau areas .But the regions Sahil,Togdheer,Sool and Sanaag were dried ,but in the last days of September the rains locally known Dier (Dayr) were started in the eastern regions ,Sahil ,Togdheer,Sool and Sanaag . Those started heavily and still continuing.

Soil Moisture

During last days that month the soil moisture of the regions were wet, according the heavy rains fallen the whole regions.

Forecasting

If the ecological condition has being favorable and contentiously like this a locust will be expecting to breed in the coastal sub-coastal and the plateau areas.

Recommendation

For that sack I am highly recommending to make several survey for the western and eastern regions, how to ensure and fallow the locust situation.

HORDHAC

Inkastoo aan la sameyn sahkankii bilaha ahaa ee la sameyn jirey bilkasta hadana waxaa wararar Ayaxa ku sahabsan laga ururiyey dadka socotdada, radio iyo wakiilada dawlada ee degan degmooyinka iyo tuuloyinka kuwaas oo si joogto ah loogala xidhiidho xafiiskan Empres Hargeisa.

Xaalada Ayaxa

Inkastoo aan sahan la qaadin bisha September 2009 wararka laga ururiey ilaha lagu kalsoon yahey waxay sheegayan in Ayax kali jog ah lagu arkey meelo ka mid ah dhinaca xeebaha gaar ahaan Osali, El-lahelay,Bullo-har iyo toga Faruur.Kaas oo u baahan in sahan la sameeyo lana soo hubiyo xaaladu sida ay tahey .

Xaalada Roobka

Gobolada Maroodi-jeeh iyo Awdal waxaa meelo ka mid ah ka daey roobabka caadi ahaan loo yaqaano (Karan) ee ka da gobolada galbeedka xiligan oo kale kuwaas oo ahaa meel dhexaad inta badana saameyey labadan gobal ee aan kor ku soo shegnay roobabkaasi ma jirin dhinaca xeebaha iyo gobolada bari sida Sahil ,Togdheer,Sool iyo Sanaag .

Ciida

Ciidu waxay aheyd qoyaan meelaha roobku ka daey labada gobal Maroodi-jeeh iyo Awdal gaar ahaan dhulka taagaga ah.

Saadaasha

Hadii ay dhacdo in roobabku si wanaagsan u sii socdaan labadan gobal ee roobaka hore gaar ahaan dhulka taagaga ah ee dooxyada Ayaxu ka dhalan karo waxaa dhici karta in Ayax ka dhasho.Sidaa darteed waxaan ku talo bixinayaa in Sahan degdeg ah la sameeyo si loo hubiyo xaalada Ayaxa.
