Monthly Desert Locust Bulletin

issue 42

November 2009

INTRODUCTION

Although I have not been carried out a survey in the month of November 2009 we have been collated information concerned locust over the radios ,extension Agents , here travelers and Nomadic people and the results had been the following: -

Locust Situation

We received unconfirmed reports concerned solitarious from the people mentioned above in the coastal areas, such as Karuure, Bararis, El-sheikh areas and Bullo-har which already had been seen solatarious adults locust last month in October 2009.

Rain

The rain had been very low in this month of November 2009 and has been fallen he is then 2.5 mm .But recently heavy clouds had been belt up and it seems moderate and heavy rain will come in the coming days.

Vegetation

In this month all the vegetation had been dried up .except the natural green once.

Soil Moisture

The soil moisture in this month of November also had been dried up because there were no rains in that month.

Forecasting

Since recently started and belt up heavy clouds, it is very likely expecting to get the short rains locally known (Hais) and if that will be happen a locust breeding will be expecting in the near future.

Therefore I am very much recommending a constantly surveys

HORDHAC

Inakstoo aan la sameyn sahamintii caadiga aheyd ee bilkasta mar la sameyn jirey waxaa hadana waxaanu ururiney wararkii ku sahabsanay Ayaxa bishii November wararkaas oo laga soo ururieyey radhyayaasha stayshinada dibada,socotada Wadooyinka iyo dadka reermiyiga.Natijadii wararka laga helayna wuxuu ahaa sedan soo socota:-

Xaalada Ayaxa

Waxaan helnay warar aan la xaqiijin oo ku sahabsan Ayax kali jog ah in lagu arkey meelaha soo socda.Karuure,Bararis,El-sheikh iyo Bullo-har ooh ore bishii ina dhaaftey ee October 2009 lagu arkey Ayax kali jog ah.

Xaalada Roobka

Bishii November xaalada roobku aadbey u yareyd gobolada Somaliland oo dhan waxaaba daey roobab ka yar **2.5mm** aakhirii bishan November 2009 maxaa yeelay ma ay jirin wax kaloo roobab oo da'ey.

Xaalada Dhirta iyo Daaqa

Xaalada dhirta iyo daaqa waxey aheyd qaley l bishan November 2009 dhirta caadi ahaan cagaaran mooyane, maxaa yeelay ma ay jirin wax roobab ah oo da'ey oo dhirta cagaar u bedela .

Xaalada Ciida

Xaalada ciidu waxey aheyd qaley l bishii November 2009 maxaa yeelay ma jirin wax roobab ah oo ciida qooya oo da'ey.

Saadaalin

Mar hadii ay dhawaan yimaadeen daruuro waa weyn oo circa jiq ku ah cimiladiina kululaatey waxaa la filayaa maalmaha soo socda in ay da'aan roobab calculus iyo kuwo meel dhexaas ahiba waxaana hubaal ah hadii ay roobabkaasi da'aan in la helayo roobabka caadi ahaan loo yaqaan (Hais) sidaa darteed in Ayax dilaacaa

to carry out.
